REALIZE-CA

Catalyzing an equitable, zero-carbon building revolution

MISSION

REALIZE-CA aims to accelerate building decarbonization by developing affordable streamlined solutions that make buildings healthier for people and the planet.

OPPORTUNITY

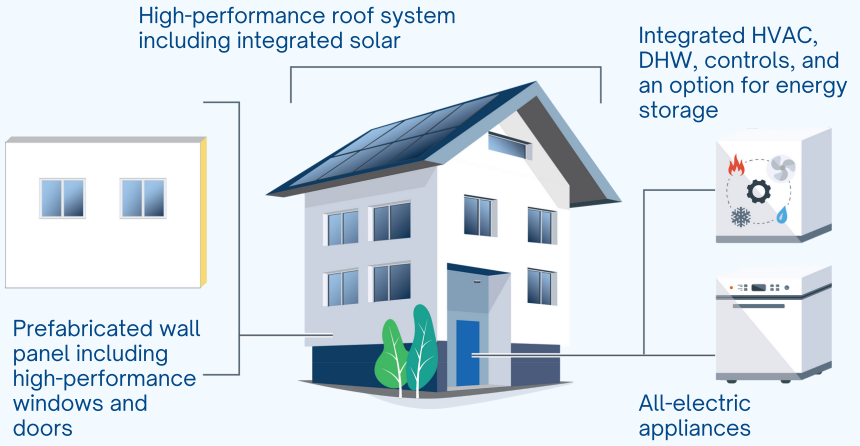
California's building sector produces 25% of the state's greenhouse gas emissions. To meet CA emission targets, we have to equitably revitalize the retrofit market by simplifying and speeding up the processes.

SOLUTION

REALIZE-CA is developing streamlined solutions for easily upgrading residential buildings, starting in multifamily affordable housing. Our goal is to accelerate the deployment of zero-carbon retrofit packages that are customizable to a particular project's needs and allow tenants to stay in their homes throughout construction.

PROGRAM VISION

- **Standardized Retrofit Package**
- **Financing Solution**
- **Performance Guarantee**
- **Inclusive Economy**



CA BUILDING OWNER PLEDGE

REALIZE-CA has released a Building Owner Pledge to demonstrate a commitment to, and demand for, zero-carbon "retrofits."
