

MOVING CLEAN ENERGY INNOVATION AT THE SPEED OF MARKETS

THE RMI INNOVATORS CIRCLE

We invite you to join the RMI Innovators Circle, an exclusive group of partners who are helping move clean energy innovation at the speed of markets, to drive a clean, prosperous, and secure low-carbon future when the world's population needs it most.

The RMI Innovators Circle is a group of partners who fuel our critical work through philanthropic support and clean energy leadership. By joining the Innovators Circle, you'll have unprecedented access to the ideas, experts, and projects that are shaping markets. But, most of all, you'll also be part of a growing network of change agents who—together—are reshaping the energy landscape as we know it.

YOUR IMPACT

Leadership is more important than ever to shape a better future for people around the world. You can help achieve these bold global goals:

- Help China to peak carbon emissions by **2030**, and enable lead cities to peak sooner
- Help **6** African countries to expand electricity access with clean technologies by **2020**
- Help to accelerate the transition to renewables in **10** Caribbean countries

Supporters make annual and sustained commitments to Rocky Mountain Institute, advancing our urgent global work to:

Empower clean energy globally—helping give more people access to cleaner air and clean energy

Transform transportation—changing the way we move people and goods to save money and carbon

Decarbonize electricity systems—creating a clean, resilient, and affordable electricity system

Catalyze efficient buildings—putting commercial and residential buildings on a pathway to zero emissions

Advance innovation—driving cutting-edge market breakthroughs that advance the clean energy economy

“What will be your legacy? When your shareholders in this decade, and later your grandchildren in your retirement, ask what you did to meet humanity's supreme energy challenge, how will you answer?”

—Amory B. Lovins, RMI Cofounder and Chief Scientist

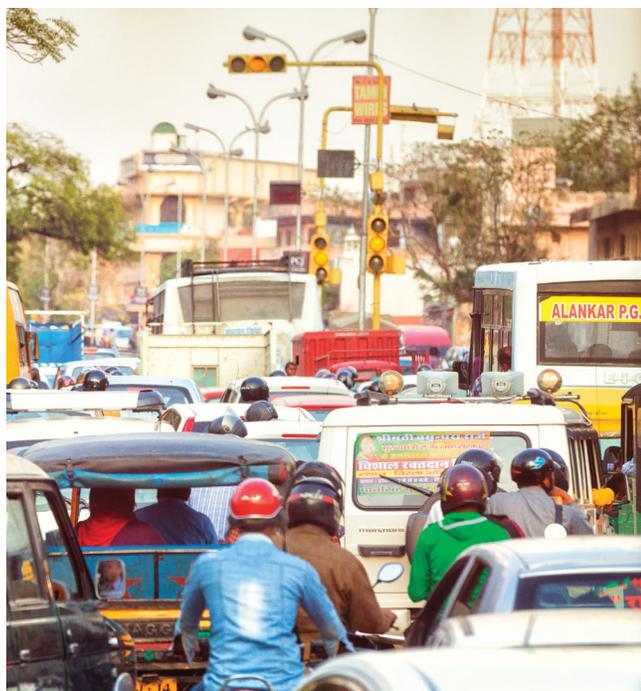

MEMBERSHIP LEVELS

Explore unique opportunities to engage with other global energy leaders

	MARKET MOVERS \$100,000+	DISRUPTERS \$50,000+	ENERGIZERS \$25,000+
Annual dinner with Amory Lovins and special guests + invitation to annual Board of Trustees dinner			
Participation in annual Innovators Circle convening + invitation to select RMI workshops			
Exclusive guided tours of RMI's groundbreaking net-zero energy offices in Colorado			
Opportunities to meet with RMI experts during special events and briefings			
Prerelease access to RMI research and reports			

Together, we're realizing rapid progress toward a clean energy future at a scale like never before:

- **We're scaling renewable energy** with RMI's Business Renewables Center and its more than 200 corporate members, which have completed more than 8,000 MW of renewable energy deals.
- **We pioneered a new framework for cities to achieve 80 percent carbon reductions in their buildings by 2050** using building sales as a trigger for energy upgrades.
- **We're helping put India in the driver's seat of a new mobility paradigm** by helping electrify 100 percent of the country's passenger mobility system by 2030.

RMI's partnership with India's government will take busy, congested streets like this and create a more efficient, safe, and convenient system through shared electric mobility solutions.

About Rocky Mountain Institute

Rocky Mountain Institute (RMI)—an independent nonprofit founded in 1982—transforms global energy use to create a clean, prosperous, and secure low-carbon future. It engages businesses, communities, institutions, and entrepreneurs to accelerate the adoption of market-based solutions that cost-effectively shift from fossil fuels to efficiency and renewables. RMI has offices in Basalt and Boulder, Colorado; New York City; Washington, D.C.; and Beijing.

GET INVOLVED

And help us move clean energy innovation at the speed of markets. Together, we can fulfill the promise of clean air, improved health and resilience, and economic opportunity that is rooted in our global shift to a clean energy future.
